2 、 Directions of 3GX interface

2-1. Execute 3GX file

After installation is finished, "3GX" short-cut will pop up on your computer. Please double-click on it.

2-2. Execute 3GX program by first time

USB driver program will be installed automatically upon 3 GX execution by first time. DOS screen tells USB driver program is being set up.

A screenshot of a DOS command prompt window. The title bar at the top reads "c:\C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\ckz_WYWF\Inst_Monx86.exe". The main area of the window is black with white text. The text displayed is: "32-bit OS detected", followed by the command path in quotes: "\"C:\DOCUME~1\ADMINI~1\LOCALS~1\Temp\ckz_WYWF\DPInstx86.exe\"", and finally "Installing driver....". The window has standard Windows-style window controls (minimize, maximize, close) in the top right corner.

2-3. 3 GX welcome screen and language selection

After driver setup is finished, 3GX welcome screen pops up. Then click on「Language..」to choose the language you are familiar with.

2-4. Interface program directions

After language is chosen, enter the page of software directions (take Chinese for example). You can click the Back or Next button on the lower left and install 3GX step by step.

2-5. Toolbar directions

You can use buttons on the toolbar to save/load parameter into/from computer disk. Function of toolbar buttons is as follows:

Open the file: open the parameter file you save on the computer disk.

Save the file: to save the currently-used parameter value into the computer disk.

Models and setup: to show the model you now choose for 3GX and parameter type.

Firmware version: to show the currently firmware version of 3GX

Connection situation: to show the connection status with 3GX for now. Green means the connection is ok just like the above illustration.
